

TECHNICAL RIDER - ENTROPIA LIVESSET (2025)

First of all, we appreciate your attention to reading this document in its entirety. This document is an integral part of the performance contract for the Entropia live set and must be strictly followed to avoid any issues during the event. If there is any discrepancy between the items described in this document and the general event rider, please feel free to contact the artist or the production team. This way, we can prevent and resolve any related issues before the event day.

—

_BACKLINE:

- 1x DJ Mixer: Pioneer DJM A9 or DJM V10 or Allen Heath Xone 92 or DJM 900 NXS II (WITH ALL 4 CHANNELS WORKING)
- Folding platform (2m x 1m) at waist height
- Both Monitors STEREO (volume control must be on the both of the mixer)
- 3x A.C's 110v
-

_SOUND SYSTEM:

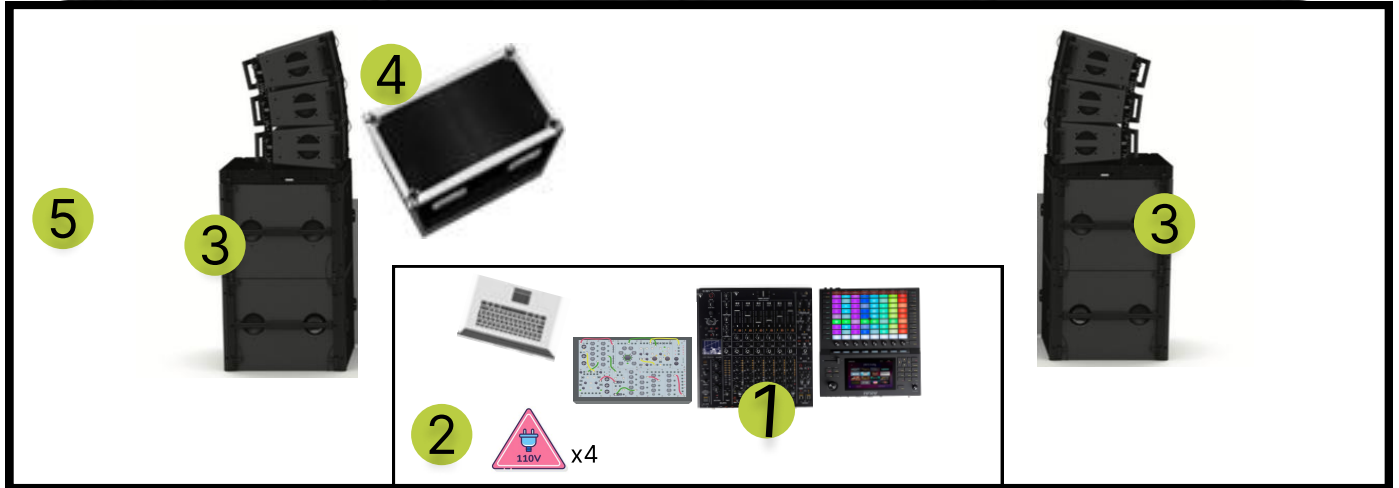

- High-quality PA system suitable for the size of the venue and the number of attendees.
- L'acoustics K-Series, d&b Audiotechnik V-Series, Funktion One dance Stack, Meyer Sound LEO, JBL VTX A12...

_MONITORS:

- Monitoring should be in stereo with subwoofers and be suitable for the size of the both area and the sound pressure of the sound system.

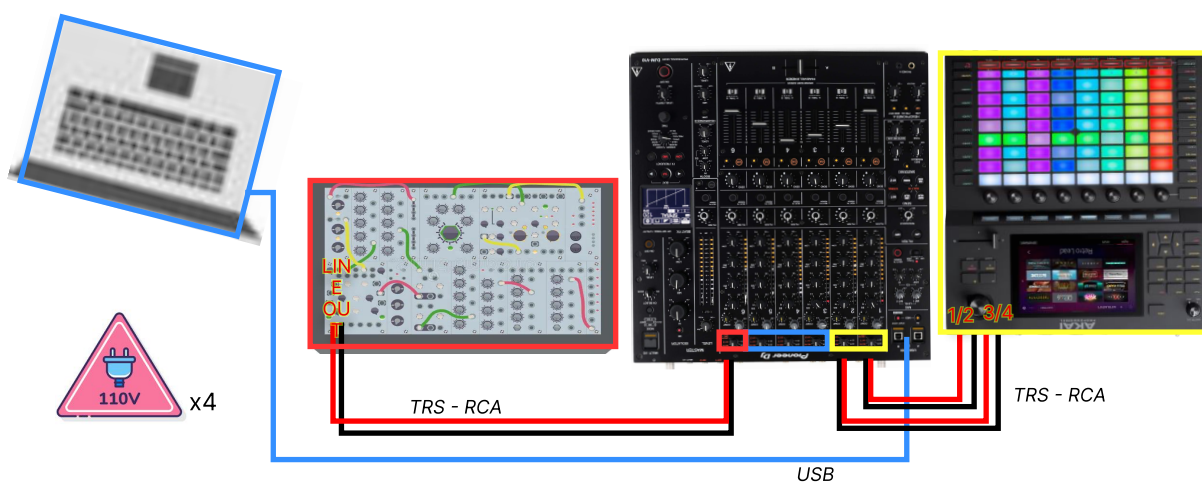

It is the event's responsibility to ensure the proper functioning of the items described above and to always consider backups for the mixer and any other electrical equipment and also make sure the stage is protected from direct sunlight and rain.
